depth incl. handle: 61

- combinable elements for the storage and transport of small parts
- manufactured from shock-resistant polystyrene
- resistant to nearly all acids and oils
- excellent temperature stability (-20° to +80°C).

Standard colours: beige, blue and white.

The steel retaining bar prevents any unintentional opening of the boxes. This simple but efficient system allows the use of the Stala Set as vehicle equipment with the advantage of a considerable space saving when compared with traditional vehicle storage equipment.

When we are talking about storage systems... Stala is simply the best solution

Organised and efficient presentation with dust-free storage of loose hardware is the basic requirements of modern stock keeping. The basis of the Stala System – a system originally developed by us – in six different sizes of transparent bins with the appropriate housing units. The modular system allows an unlimited enlargement in width and height.

Self-adhesive label bar

- resistant to nearly all acids and oils
- excellent temperature stability (-20° to +80°C)
- material resistant to food flavours

With this range Stala shows its real potential, and no doubt about it!

Well thought-out solutions offering functionality and openness enable the user to see a good selection and then to have quick access to the chosen products.

The standard range of cabinet variations can be supplemented by further special versions differing in the combination of dimensions and colours. Therefore, the Stala System offers options in layout and economy of space that set no limits to fantasy.

Stala Shopconcept offers simple and eye-catching designs as well as simple and effective solutions.

Do not hesitate to contact us; we will be pleased to give you advice.
